PROFILE

Software developer with experience building warehouse and enterprise web applications across Java/Spring Boot, C#/ASP.NET, React, and PostgreSQL. Deliver features from database and API to interface, testing, and deployment. Based in Morocco; available now for remote full-time or freelance work.

EXPERIENCE

Full Stack Developer | EasySoft | Oct 2024–Jul 2025

- Built warehouse inventory workflows with Java, Spring Boot, Vaadin, and PostgreSQL; integrated RFID and PDA devices for stock capture.
- Improved application performance, reducing load time by a measured 30%.

Full Stack Developer, part-time | Expertus | Nov 2024–Jun 2025

- Developed and maintained enterprise web applications with C#, ASP.NET, Telerik Kendo UI, and PostgreSQL.
- Improved interface and database interactions, resolved production issues, and supported application stability.

SELECTED PROJECTS

Arwa Shop / PrimeCart | E-commerce project in progress

- Define requirements and review work with ChatGPT agents on a React/TypeScript storefront, Express API, and PostgreSQL data layer; check generated changes against the application and tests.

Mediaverse | Independent full stack project

- Built a responsive content site with a custom CMS and search; handled database design, application development, and deployment.

Dental practice demo | Browser prototype

- Built sample patient, visit, payment, and queue workflows in JavaScript with local browser storage; designed for demonstration, not clinical use.

TECHNICAL SKILLS

Java, Spring Boot, C#, ASP.NET, JavaScript, TypeScript, React, Express, HTML, CSS, REST APIs, Vaadin, Telerik Kendo UI, PostgreSQL, MySQL, Git, Docker

EDUCATION

European Bachelor's in Web Development (Webmaster) | FEDE | 2025

DUT in Computer Science | Group IISGA
